The water meter graft is bobbing its head up again.

It is proposed to install every lot in Chicago from \$200 to \$500 for water meters, because the great expense it will entail upon all users of water.

Chicago has an immense water fund. If part of it was devoted to wards building pumping stations at the lake end of every section line in Chicago there would be no water famine anywhere.

It is astonishing what men the water meter people can influence to 'help' way of thinking.

Some men who ought to know better are talking for water meters.

More than that the "high pressure" scheme is up again.

According to some advocates it will only cost thirty or forty millions of dollars to install meters and a "high pressure" system. The poor will have to pay the cost.

With half this sum additional pumping stations could be built which would more than supply the demand.

A well known engineer who was advocating "high pressure" and water meters said the other day, according to daily papers, that one of the chief troubles in Chicago was the very high consumption of water, which averaged about 2,000 gallons per capita daily, caused largely by waste and underground leakage from broken connections.

As a remedy for waste he recommended water meters. The test of the water pressure made in the loop shows an insufficient pressure, but he said that the city was installing a large number of water mains, none under eight inches, and these would materially improve the pressure.

The health of the city demands plenty of water for everybody.

The installation of meters would limit the consumption of water and raise the price of living on the poor.

Higher rates would have to be charged in the residence districts and tenants would have to pay the water rates after the landlords had paid an exorbitant rate for installing water meters.

This form of graft is particularly objectionable to Chicago people. They will not stand for it.

It hits everybody and it is unnecessary.

CHICAGO HAS ESSANAY

Big Film Company Closes Other Establishments and Concentrates Its Studios Here.

Chicago now has exclusively, the biggest film company in America. With the opening of a new studio, the third on the north side, the Essanay company has chosen its two outside establishments, one in Niles and the other in Los Angeles, preferring to concentrate its efforts in Chicago. Of the four prominent concerns identified with the film industry, Solig, Essanay, Kleine and American, Essanay is the only company with a permanent producing plant in this city.

Selig takes the pictures at his studio in Chicago intermittently, while in Edendale, Cal., he produces plays continuously; the American has its studios in Santa Barbara, Cal., and conducts its business affairs in this city; and Kleine's producing activities are in the Bronx, New York City.

The Essanay studios are equipped with artificial lighting facilities which enable its producers to stage plays in all sorts of weather, while the days of sunshine are devoted mostly to exterior scenes. George K. Spoor, president of the company, has been a persistent booster for Chicago on account of its central location.

"I have always believed that Chicago is the natural distributing center of the United States," he said, "and for the shipment of goods excels any other American city for centralization."

I closed my western studios and increased my Chicago holdings because I want the plays produced by our company to be as close to the distributing center as possible.

"It is not necessary to go to California for sunlight; artificial light makes an ideal substitute, and you need not fret over rain and clouds. While in the past capital was represented mostly in the east, there is a trend toward this city in that direction."

I believe that both manufacturer and distributor of motion pictures logically belong in Chicago on account of its central location and railroad facilities.

Q. J. Chott, the well known lawyer, who made a good record on the justice bench, would make a good Municipal Judge.
